

Clean Energy Committee Notes – March 11, 2021, 7pm – 8:15 pm

Attendance: Kelly Jasinski, Rob Fendrick, Ben Baskin, Maegan Frantz, Dan Leatham, Ruth Osterlitz, Al Longtin. Guest presenter Jill Henck from CDRPC

This meeting was video recorded.

Jill educated the committee on the LED Streetlight Conversion High Impact Item from NYSERDA's Clean Energy Community Program.

Two options exist.

1. Utility owned conversion. National Grid remains the owner and takes care of maintenance
2. Town can purchase the lights from National Grid. There are companies that will provide a maintenance contract for streetlighting.

We need to determine if there are decorative streetlights in our town. There are two different options for this High Impact Item.

Lots more options to determine. Including smart lighting technologies now available. Please watch the recording for more information.

The Benchmarking Upgrade has been submitted.

The Scoping Document for Community Solar has been submitted. Thank you Maegan!

Rob Fendrick will be coordinating the LED Lighting project.

Maegan will be writing the letter to submit to Eric Connolly to send to National Grid for updated quotes.

Al Longtin will be reaching out to Clifton Park for information on EV Station zoning.

Ben Baskin will be working on EV Station community outreach.

Kelly will send NG Lighting list to Jill and cc all so that everyone is in the same loop.

Next meeting is on Thursday April 8th at 7 pm.
